MSS MANAGER | GENEVA | FULL-TIME | AVAILABLE INSTANTLY

About us:

ZENDATA is a leading player in the cybersecurity industry, offering services such as complete, fully managed cyber protection, vulnerability assessment, pen testing, and red teaming. With locations in Geneva, Dubai, and Bahrain, ZENDATA provides services to clients globally and collaborates with law enforcement authorities and threat intelligence companies. As an official cybersecurity expert of the Swiss federal government, ZENDATA's expertise is recognized by institutions, businesses, and the media.

Role Description:

The Managed Security Services Manager oversees the planning, development, implementation, and operations of ZENDATA Cyber Security Services. He/She is responsible for managing a team of security professionals and ensuring that security operations run smoothly and efficiently. The Manager works closely with senior management team of ZENDATA.

Primary Responsibilities:

- Overseeing the planning, development, implementation, and maintenance of security measures to protect an organization's systems and data
- Managing a team of security professionals and ensuring smooth and efficient security operations.
- Working closely with senior management, providing feedback and visibility of quality of services and effectiveness of operations.
- Providing guidance on security best practices and compliance requirements
- Staying up to date on the latest security threats and technologies to continually improve the organization's security postures.
- Support on pre-sales on creation of service offerings.

Skills and Qualifications:

- Minimum of 5-7 years of experience in cybersecurity, with at least 3 years in a SOC or incident response team leadership role.
- Bachelor's degree in Cybersecurity, Information Technology, Computer Science, or a related field. Advanced degrees and relevant certifications such as CISSP, CISM, or SANS GIAC are preferred.
- Strong leadership skills with experience in building and leading high-performance security teams.
- Strong understanding of security technologies, security standards, regulations
- Excellent communication and interpersonal skills
- Excellent project management skills and the ability to prioritize and manage multiple tasks effectively.
- Extensive experience in handling security incidents, including detection, analysis, containment, and recovery.
