CYBER DETECTION AND RESPONSE ANALYST | BAHRAIN | FULL-TIME | AVAILABLE INSTANTLY

About us:

ZENDATA is a leading player in the cybersecurity industry, offering services such as complete, fully managed cyber protection, vulnerability assessment, pen testing, and red teaming. With locations in Geneva, Dubai, and Bahrain, ZENDATA provides services to clients globally and collaborates with law enforcement authorities and threat intelligence companies. As an official cybersecurity expert of the Swiss federal government, ZENDATA's expertise is recognized by institutions, businesses, and the media.

Role Description:

This is a full-time on-site role as a senior Detection and Response Analyst in our Security Operations Center (SOC) Team located in Bahrain. The role will be part of a team of SOC analysts of our ZEN360 Detection & Response environment to detect, respond to, mitigate, and report on cybersecurity incidents.

Primary Responsibilities:

- Monitor, protect, and defend MSSP clients against malicious network traffic.
- Monitor, protect, and defend internal networks and hosts against ongoing and emerging threats.
- Conduct security event analysis and validation, triage validated incidents, perform initial containment where feasible, research incidents and enrich incident case documentation, and escalate incidents for further analysis, containment, and eradication.
- Review and analyze threat intelligence information and proactively search applications, systems, and network logs to hunt for and thwart relevant threats identified threats.
- Contribute to the development and maintenance of playbooks to establish and continuously improve the team's operating knowledge base.
- Participate in post-incident activities and contribute to lessons learned to improve security operations.
- Provide sound technical recommendations that enable remediation of security issues.
- Utilize advanced threat models, SIEM use cases, and incident response playbooks.

Skills and Qualifications:

- Bachelor's Degree in an IT-related field with a minimum of 1 years of experience in the areas of incident detection and response, malware analysis, or computer forensics.
- Excellent knowledge of cybersecurity protocols and procedures.
- Experience with SIEM technologies (such as Elastic or Splunk) and other security tools.
- Strong analytical and problem-solving skills and attention to detail.
- Excellent communication and interpersonal skills, be able to effectively communicate security concepts and protections to technical and non-technical audiences.
- Relevant certifications in Blue Teaming or Forensics.
